

A LIFT BRIDGE OVER ELIZABETH

Norfolk and Berkeley to Be Connected Between Their Business Centres.

OVERHEAD RAILROAD TRACKS

Norfolk and Western Railway, the Norfolk Railway and Light Co. So-operate With City.

(Special to The Times-Dispatch.)

NORFOLK, VA., January 31.—There were one hundred and twenty-one men discharged from the navy-yard-to-day under the deficiency order of Secretary Bonaparte. The number from the steam engineering department was seventy-three, and forty-eight were from the department of construction and repair. More discharges are expected, and there is great anxiety among the 2,000 men employed in the yard.

LIFT BRIDGE

The Norfolk and Western Railway, the Norfolk Railway and Light Co. and the Public Utilities Commission, representing the city, will co-operate to suggest a plan by which a lift bridge can be built from the foot of East Main Street across the eastern branch of the Elizabeth River, connecting the business centers of Norfolk and Berkeley, the understanding being that the crossing of the Norfolk and Western tracks on this side of the river shall be overhead and not at grade.

BID FOR NORMAL SCHOOL

Norfolk officials for the proposed State Normal School, a ten-acre site in the City Park or elsewhere, to cost the city not more than \$50,000, and an annuity of \$5,000 for ten years. The Select and Common Councils have agreed upon this proposition, which will be conveyed to the legislative committee in Richmond by the School Commission. The city is also in connection with several other cities interested. Superintendent Doble, Superintendent West, of Norfolk county, and Superintendent Saunders, of Portsmouth, all favor the bringing of a normal school to this section. Portsmouth city and Norfolk county will offer additional inducements to bring the school here, as both will be benefited as well as Norfolk.

Plumbers Will Strike.

(Special to The Times-Dispatch.) NORFOLK, VA., January 31.—The journeymen plumbers of Norfolk have served notice on the master plumbers that they will demand on May 1st \$5 a day for first class men, and \$4.25 a day for second class men, together with a four-hour day on Saturday. In view of the fact that no plumbers can work in Norfolk without a license, the master plumbers would have difficulty in getting men to fill the places of their present employees in event of a strike. Wages of the plumbers were raised last September to \$4 and \$3.25.

TERRIBLE ITCHING SCALP HUMOR

Badly Affected With Sores and Crusts—Extended Down Behind the Ears—Some Years Later Painful and Itching Pustules Broke Out on Lower Part of Body—Son Also Affected.

A TRIPLE CURE BY CUTICURA REMEDIES

"About ten years ago my scalp became badly affected with sores and itching humors, crusts, etc., and extending down behind the ears. My hair came out in places also. I was greatly troubled; understood it was eczema. Tried various remedies, so called, without effect. Saw your Cuticura advertisement, and got them at once. Applied them as to directions, etc., and after two weeks, I think, of use, was clear as a whistle.

"I have to state also that late last fall, October and November, 1904, I was suddenly afflicted with a bad eruption, painful and itching pustules over the lower part of the body. I suffered dreadfully. In two months, under the skillful treatment of my doctor, conjoined with Cuticura Soap and Cuticura Ointment, I found myself cured.

"Six years ago my son was laid up with a severe cold, a hard cough, and finally painful eruption all over the body. I procured the Cuticura Remedies as soon as possible, and after his faithful use of same was as well as ever in two weeks, as well as I can recall. He has never had a return of the illness, as far as I know.

"I have always been pleased to commend the Cuticura Remedies, and testify as to their efficacy. I am a veteran of the late Civil War, 61-65, between seventy and eighty years of age. Yours truly, H. M. Weiss, Rosemond, Christian Co., Ill., Aug. 31, 1905."

drin, who is to come here to testify that he married Hunter and the latter's first wife, can, after testifying at the preliminary trial, go immediately before the February grand jury Monday and testify before the petit jury on Tuesday of next week, the date of the prisoner's trial.

Mr. Jas. M. Stansbury, of Baltimore, is here in the interest of opening a cannery for packing fruits and vegetables. He was engaged in the business several years ago in West Point.

FELL UPON A SHARP PRONG

(Special to The Times-Dispatch.)

CHARLOTTE, N. C., January 31.—Samuel B. Hayes, foreman for a local transfer company, was fatally injured this afternoon in an unusual way. The transfer wagons were engaged in hauling the baggage and scenery of "The Tenderfoot" Company from the depot to the theatre and Hayes rode on top of a wagon piled high with trunks. As the wagon backed up in the rear of the Academy of Music he lost his balance and fell, striking one of the sharp pronged standards of the wagon in his fall. A great clump of flesh was torn from his body near the spinal column by the standard. He has not regained consciousness and attending physicians say he cannot recover.

One of the largest single real estate deals in Charlotte's history, was closed here to-day, when H. T. McKinnon, of Georgia, purchased the Hunt building at Third and Tryon Streets, a three-story office structure. The consideration was fifty thousand dollars. Mr. McKinnon has amassed a fortune in the turpentine business in Georgia and now retired. "All make this city his home."

NORTH VIRGINIA TO QUIT UNDER FIRE

Chief of Census Bureau Says He is Tired of Receiving Complaints From South.

ASKS CONGRESS FOR RELIEF

Claims Cotton Men Make Charges Which They Have Failed to Establish.

(By Associated Press.)

WASHINGTON, D. C., January 31.—Having taken notice of the criticisms upon his office by President Harvey Jordan, of the Southern Cotton Growers' Association and others, Director North, of the Census Bureau, to-day declared that he hoped Congress would relieve him of all further work in connection with cotton statistics.

"It is the most disagreeable and annoying work I have ever known," said Mr. North to-day. "These reports are gotten up for the benefit of the Southern people, but they seem to be devoting all their energies toward discrediting them."

A telegram from a planter in Louisiana, received to-day, charged Director North with doing a great injustice to Southern planters by keeping back the weight of bales and enabling a certain cotton speculator "and his diabolical crew" to rob the South.

Unable to Find Errors. In answer to the allegation made by President Jordan yesterday, Director North said:

"These cotton ginning reports were established by law for the benefit of the cotton growers, and I have believed they were effective to that end, but the representatives of the growers, like Mr. Jordan and J. A. Taylor, president of the Cotton Ginner's Association, seemed determined to do everything in their power to discredit the reports and thus destroy their value, and, under these circumstances, I do not believe it worth while for Congress to continue to appropriate \$250,000 a year for the collection of reports in the interest of the cotton growers when these men are dissatisfied with the results. No effort to show that the reports are inaccurate, misleading or manipulated has been successful. The methods of the cotton growers have exhibited to representatives of the growers and their records scrutinized by them, and they have not found it possible to put a finger upon a single error, either in method or result. There has never been a leak from the Census Office since the system was established.

Mr. Jordan now attacks the director because he refused to deviate from the regular methods of promulgating these statistics at the demand of private parties. Any such deviation made upon the personal responsibility of the director would necessarily subject his methods to suspicion, and would very properly impair the public confidence in the integrity of his work. He has, therefore, declined to accede to these requests unless directed by Congress to do so.

"The estimates of cotton remaining to be ginned, whose publication Mr. Jordan demands, are obtained by the Census Office at its mid-January canvass, for the purpose of enabling it to determine what counties need not be canvassed when the final canvass takes place in March. Whenever the estimates show that there is no more cotton to be ginned in a county, or that the amount is insignificant, no final canvass is necessary. Possession of this information enables the Census Office to save from \$3,000 to \$12,000 in the cost of the final canvass, and that is the only purpose for which these estimates have ever been used.

"They are only approximate and, therefore, possess no statistical value. For the director to make them public on his own volition, at the demand of the cotton growers, would be as improper as this time as it would be to make them public at the time the cotton speculators if the demand happened to come from that quarter.

Demand the Impossible. With regard to the publication of the census bale-weights, to which Mr. Jordan also alluded, I can only say that actual weights of more than 3,000,000 bales of cotton grown in 1935 have been secured by the census office, and that additional returns covering 2,000,000 more weights are daily reaching the office. The computations necessary to secure correct average weights from these returns are enormous in amount and delicate in character. With our utmost energy we shall not be able to complete these computations before the last of February, and yet I am daily in receipt of telegrams from the South, stating that by keeping back the weight of bales, I am enabling speculators to rob the South."

Director North pointed out the real mark that "All these circumstances have caused me to pray that Congress might relieve me of this work."

THE VALUE OF CHARCOAL.

Few People Know How Useful It Is in Preserving Health and Beauty. Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after eating, drinking or after eating onions and garlic. It cleanses the system and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal is the one that is made from the wood of the white oak. It is the only charcoal that is made from the wood of the white oak.

Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the blood. It is the only charcoal that is made from the wood of the white oak.

The daily use of these lozenges will soon tell in much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but, on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal, says: "I have used Stuart's Charcoal Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the blood. It is the only charcoal that is made from the wood of the white oak."

Stuart's Charcoal Lozenges are made from the wood of the white oak, and are the only charcoal that is made from the wood of the white oak.

MAN-WOMAN'S BROTHER ADMITS RELATIONSHIP

Judge Webster, of Gaffney, S. C., Says Missouri Masquerader is His Sister.

(Special to The Times-Dispatch.)

GAFFNEY, S. C., January 31.—A story that has caused no little surprise in South Carolina generally and Gaffney especially, is an account of Pauline Webster, who was arrested in Kansas City, Mo., a few days ago, masquerading in the garb of a man. Her disguise was good, as she had succeeded in marrying herself to another woman, a Miss Jelly, restaurant keeper in Kansas City. She told the police of that city that she had worn a man's garments for three years, but was really Pauline Webster, formerly of Gaffney, S. C. She gave the names of brothers here and of her father, Noah Webster, who died many years ago.

Pauline Webster left Gaffney many years ago, and was thought to have been dead. She has a brother living here and a sister near this city. When seen shortly after the affair, her brother, Judge of Probate J. E. Webster, of Gaffney, gave it as his opinion that his sister was dead and that the Kansas City woman was a fake. However, he has since gained information that she is no other than the Pauline Webster, originally from Gaffney, although she had not been heard from for twelve years.

In a statement to-night Judge Webster said that her people are capable of attending to her wants, and can send her property here without aid of "jack-leg attorneys or sharks." Pauline Webster is entitled to a considerable amount of property in Gaffney, which prompted the judge's comment regarding jack-leg attorneys who, he says, would cause strife and dissension.
